Zestra™ for Women is the unique topically applied feminine massage oil that was scientifically formulated by pharmacists to enhance female sexual pleasure, increase genital warmth, sensitivity, sensation, & facilitate arousal when applied to the external female genitalia (clitoris, labia, and vaginal opening). The natural botanical ingredients in Zestra™ for Women have long been available in the United States as dietary supplements, ingredients in foods and/or cosmetics, or are listed as "Generally Recognized As Safe" (GRAS List) by the FDA. In clinical studies conducted by recognized sexual medicine experts, Zestra™ for Women improved level of desire, satisfaction with level of sexual arousal, genital sensation, sexual pleasure, ability to have orgasms, and enhancement of sexual experiences in women. Zestra™ is the only topically applied product for women that has been published in highly-respected journals (*The Journal of Sex & Marital Therapy*, January 2003 -- *Drugs* 2003; 63 (14): 1445-1457).

Instructions:

The gentle application of Zestra™ easily becomes a natural, enjoyable part of foreplay that can actively contribute to feminine sexual pleasure and satisfaction.

First, tear off the top of the foil pack, and pour the contents over the cupped palm of your hand or fingers. Apply with gentle massage to the external female genitalia (clitoris, labia & vaginal opening) for 5 minutes prior to vaginal intercourse.

During foreplay, you or your partner should gradually apply the oil with gentle massage onto the clitoris, labia and outer areas of the vagina. Massage in tenderly for 5 minutes. The effects generally begin in about 4 to 5 minutes. You may experience a gradual genital warming effect that will build to a pleasurable level and then plateau within about 10 minutes. You may also experience heightened genital sensation to touch and/or sexual intercourse, heightened arousal and increased sexual pleasure. The effects generally last 30-45 minutes with a single application. Repeat as often as desired. To remove, simply wash off.

How Supplied:

Zestra™ is supplied in 1ml foil sachets that represent a sufficient quantity for one sexual encounter.

* Upon first use Zestra's unique effects tend to pleasantly "surprise" most women. Since you are in complete control of your desired intensity, women wishing to enjoy more intense pleasurable sensations can simply use more Zestra™ oil, up to the recommended volume of 1.0ml per each sexual encounter. Zestra™ sachets are supplied with intact tamper-evident safety seals for your protection and to insure product integrity. Zestra™ sachets are also labeled with manufacturing "Lot Numbers" and "Product Expiration Dates".

Ingredients:

Zestra™ is a proprietary combination of the following all-natural botanical ingredients:

"PA-free" Borage Seed Oil (Starflower oil), Evening primrose oil, Special Extract of Angelica, Special Extract of Coleus, and the anti-oxidants; ascorbyl palmitate (lipid-soluble Vitamin C) and alpha-tocopherol (Vitamin E), along with natural fragrances.

United States and International Patents Pending

Condom Use:

The importance of practicing "safe-sex" cannot be overstated and sexually-active condom users should already be aware that "latex" condoms are not compatible with petroleum-based oils such as light mineral oil (Baby Oil) or even petrolatum (Vaseline®).

Zestra™ is a special blend of consumable botanical oils that have different physical properties from petroleum-based products.

You may use condoms with Zestra™ but you need to use a polyurethane condom, as they are specifically designed for use with oil-based lubricants.

An added plus of "polyurethane" condoms is that they transmit body heat between partners much better than latex condoms.

The following is a list of popular polyurethane condoms and each manufacturer's description:

Avanti®

Durex's Revolutionary "Non-Latex" Condoms are thinner and more sensitive than regular latex condoms. Ideal for latex sensitive condom users the unique non-latex material is sensitive, clear, odorless, and safe with oil based lubricants. Each condom is individually tested for maximum reliability. Made from polyurethane.

Femidom™ Female Condom

Presenting an alternative to male condoms. Femidom™ is the first condom designed to be worn by a woman and is manufactured in the UK by The Female Health Company. Made of soft polyurethane, Femidom is hypo-allergenic, heat conductive, and has been reported to increase the sensitivity for both women and men. The Femidom™ female condom has been available since 1994. Because it is made from Polyurethane the Femidom™ condom can be used with oil and water based lubricants. The Femidom™ female condom is an excellent alternative for couples with latex allergies, who are otherwise unable to use a regular latex condom. Femidom is available from larger Boots stores, independent pharmacies, family planning clinics or by mail order.

Precautions:

- Apply Zestra™ to External Female Genitalia.
- Zestra™ is Intended for Vaginal Intercourse and Manual Stimulation.
- The ingredients in Zestra™ are safe to ingest, but it is not flavored or sweetened.
- Do not use if you have a known hypersensitivity (allergy) to any of the natural ingredients.
- Apply Zestra™ first to fingers & then to genitals.
- Do not use if you are pregnant or breast-feeding.
- Do not use if you are presently trying to conceive.
- Do not use if you have any type of vaginal infection or irritation, such as a yeast infection.
- Keep out of reach of children.
- Avoid contact with eyes. If eye contact occurs, rinse with water to remove.
- Do not use if tamper-evident safety-seal is broken.
- Zestra™ should be stored at room temperature. Do not store in direct sunlight and do not refrigerate or freeze.

Developers:

QualiLife Pharmaceuticals, Inc. is a science-driven company focused on developing & commercializing meaningful consumer products for the sexual health marketplace. The Company combines its expertise in pharmacology, neurology, transdermal delivery and medicinal chemistry together with identification of "bio-active principles" in plants to develop highly innovative consumer products with significant commercial potential. The Company applies its integrated approach to specific target areas where it has substantial expertise. QualiLife Pharmaceuticals' believes this R&D strategy increases the chances of successfully developing widely embraced commercial products. These target areas primarily involve female and male sexual health, and other natural products that deliver substantial quality of life enhancements.

The mission of the Women's Consumer Product Division of QualiLife Pharmaceuticals is to target large unmet needs in Women's Health -- and to address those needs with novel, effective consumer products that can improve the quality of life for millions of women.
